PDPA Snapshot — Full Report

"Full Report" here means the complete, untruncated findings of your PDPA Snapshot — the same automated scan as the standalone PDPA Quick Scan, over the same public web surface. It is a fuller presentation, not a deeper scan.

Status	completed
Compliance Score	76 / 100
Scanned URL	https://example.com
Risk Level	Medium
Findings	6 total — 2 High · 2 Medium · 2 Low
Frameworks Detected	PDPA (Singapore) 2012, PDPA Amendment 2020

Scan Scope

Pages crawled	14
Scan window (UTC)	2026-06-07 08:34:10 → 2026-06-07 08:34:54
SSL Labs	Grade A (checked 2026-06-07)
Excluded from scan	Authenticated areas (login-gated routes); API endpoints; Mobile applications; Subdomains not crawled from the seed URL
Scanner	Booppa PDPA Scanner v1

Scope disclosure: Booppa's automated scanner crawls the public web surface of the seed URL only. Authenticated areas, APIs, mobile apps, and uncrawled subdomains are out of scope and may carry independent risks not reflected in the findings above.

Executive Summary

Automated scan of example.com surfaced 6 PDPA-relevant findings: two HIGH (missing breach-notification clause; no published sub-processor list), two MEDIUM (cookie consent granularity; retention schedule), and two LOW (DPO contact published; SAR form present). Remediation focuses on transparency obligations under s. 11, 13, 25, 26 and 26A.

Detailed Findings (6)

1. Privacy policy missing breach notification clause

HIGH

Description	Privacy policy does not specify the 72-hour PDPC notification timeline for notifiable data breaches.
Legislation	PDPA s. 26A-26E — Data Breach Notification Obligation
Evidence	Privacy page does not mention 'notifiable data breach' or 72-hour PDPC notification window.
Recommendation	Add a Breach Notification section to the privacy policy stating the 72-hour PDPC notification commitment for notifiable breaches.

2. DPO contact published

LOW

Description	Dedicated DPO email on Privacy page satisfies PDPA accountability.
Legislation	PDPA s. 11 — Accountability Obligation
Evidence	Privacy page: dpo@example.com
Recommendation	Add an SLA for DPO response time on the same page.

3. Cookie consent banner present but lacks granular toggles

MEDIUM

Description	Site shows a single accept/reject banner; PDPA-aligned but not granular for analytics vs. marketing cookies.
Legislation	PDPA s. 13 — Consent Obligation
Evidence	https://example.com/ — first-visit banner; one accept + one reject button.
Recommendation	Add per-category toggles (Essential / Analytics / Marketing) and persist the buyer's choice for 365 days.

4. No published data retention schedule

MEDIUM

Description	Privacy policy mentions retention 'as long as necessary' without per-category timeframes.
Legislation	PDPA s. 25 — Retention Limitation Obligation
Evidence	Privacy page — 'Retention' section uses 'as long as necessary' without categorical limits.
Recommendation	Publish a retention schedule by data category (e.g. account data: 7 years post-closure; marketing: 24 months from last engagement).

5. Subject Access Request (SAR) form provided

LOW

Description	SAR submission form available at /privacy/sar with email + identity verification.
Legislation	PDPA s. 21 — Access & Correction Obligation
Evidence	https://example.com/privacy/sar — form present, identity verification step described.
Recommendation	Publish the 30-day SAR response SLA on the same page so requesters know the timeline.

6. No published list of overseas sub-processors

HIGH

Description	Privacy policy mentions 'cloud providers' generically without naming them; PDPA s. 26 requires comparable protection for overseas transfers.
Legislation	PDPA s. 26 — Transfer Limitation Obligation
Evidence	Privacy page — no Sub-processors / Third-party processors section enumerating named vendors.
Recommendation	Publish a Sub-processors page listing named vendors, processing purpose, hosting region, and the safeguard relied on (SCCs / equivalent protection).

■ RFP Complete Kit — Full Q&A

Status	completed
Product	Rfp Complete
Q&A Coverage	15 questions answered
Answer Source	Ai Grounded

Bid Kit Download	Available — see email

Executive Summary

RFP Complete Kit covers 15 PDPA, ISO, encryption, residency, sub-processor, BCP/DR, and breach-history questions. 11 of 15 answers verified against intake or website signals; 4 are AI-drafted from policy defaults and flagged for buyer review.

RFP Q&A (15)

Q1. Are personal data stored at rest using AES-256 or stronger encryption?

INTAKE + WEBSITE

Yes — at-rest encryption is enabled across all production databases using AWS KMS with AES-256 keys. Daily snapshots inherit the same key.

Evidence: S · e · c · u

Q2. What is the bidder's data residency for personal data in scope?

FROM YOUR INTAKE

Singapore residency — all production data is hosted in AWS ap-southeast-1 (Singapore region). No personal data is replicated outside the SG region.

Evidence: C · o · n · f

Q3. Is the bidder ISO/IEC 27001 certified?

FROM YOUR INTAKE

Yes — ISO/IEC 27001:2022 certified, certificate IS-7XX-22 issued by BSI, valid through 2027-04-30.

Evidence: I · n · t · a

Q4. Has the bidder appointed a Data Protection Officer (DPO)?

INTAKE + WEBSITE

Yes — a DPO is appointed and contactable at dpo@example.com. The DPO reports to the CEO and reviews policy changes quarterly.

Evidence: P · r · i · v

Q5. Does the bidder maintain a Business Continuity / Disaster Recovery plan?

FROM YOUR INTAKE

Yes — RTO is 4 hours, RPO is 15 minutes. The plan is tested twice yearly with live failover to a secondary AZ in the same region.

Evidence: I · n · t · a

Q6. What encryption is used for data in transit?

VERIFIED ON YOUR WEBSITE

TLS 1.2 minimum across all external surfaces; internal service-to-service traffic uses mTLS within the VPC.

Evidence: S · S · L ·

Q7. Has the bidder experienced any notifiable data breaches in the past 24 months?

FROM YOUR INTAKE

No — no notifiable data breaches under PDPA s. 26A in the past 24 months.

Evidence: I · n · t · a

Q8. What are the bidder's published sub-processors?

FROM YOUR INTAKE

AWS (hosting, Singapore region), Stripe (payments, US-hosted with SCCs), Resend (transactional email, EU-hosted with SCCs).

Evidence: I · n · t · a

Q9. How frequently is staff trained on PDPA / data-protection obligations?

FROM YOUR INTAKE

Annually for all staff, with a quarterly micro-module for staff handling personal data directly.

Evidence: I · n · t · a

Q10. What is the bidder's SAR (Subject Access Request) response SLA?

AI DRAFT — REVIEW

30 days from receipt of a valid request, in line with PDPC guidance.

Evidence: N · o · i

Q11. Does the bidder run regular penetration tests?

AI DRAFT — REVIEW

Yes — third-party penetration test annually; remediation report shared with enterprise customers under NDA.

Evidence: C · o · m · m

Q12. What's the bidder's policy on retention of personal data?

AI DRAFT — REVIEW

Account data retained for 7 years after closure (tax / dispute window); marketing engagement data retained 24 months from last interaction; logs retained 90 days.

Evidence: D · e · r · i

Q13. Does the bidder have a documented incident response plan?

AI DRAFT — REVIEW

Yes — IR plan with on-call rotation, severity tiers, and a 72-hour PDPC notification track for notifiable breaches.

Evidence: A · l · i · g

Q14. Is the bidder a Singapore-registered entity?

EXTERNAL EVIDENCE

Yes — Sample Pte Ltd, UEN 202506025X, ACRA-registered.

Evidence: A · C · R · A

Q15. What's the bidder's MAS TRM posture (if applicable)?

AI DRAFT — REVIEW

Self-attested alignment with MAS TRM Guidelines (Jun-2021 revision) across the 13 domains; full gap analysis available under NDA.

Evidence: S · e · l · f

Signed Cover Sheet	Pending manual upload of signed Cover Sheet. Sign this PDF, then upload the signed copy at booppa.io/compliance/cover-sheet using your 1 included credit. Once anchored, this row updates with the tx.

Anchor guarantee. Each transaction above commits a SHA-256 hash of the corresponding artifact to Polygon Amoy Testnet via the EvidenceAnchorV3 smart contract. This proves the artifact existed at the timestamp of inclusion in the recorded block — sufficient for integrity verification and audit-trail purposes. Polygon Amoy is a testnet, intended for evidence anchoring; it does not provide the financial-grade settlement guarantees of a mainnet chain. Anchors are independently verifiable by reading the EvidenceAnchorV3 contract on Polygon Amoy with any standard Web3 client.

3	Compliance Cover Sheet (this PDF)	3c3c3c3c3c3c3c3c3c...3c3c3c	0x3c3c3c3c3c...3c3c3c

Each document above has been hashed with SHA-256 and anchored to the Polygon Amoy Testnet network. Verify at booppa.io/verify/<hash> or via the linked Polygonscan transaction.

Top 3 risks from the scan

1. Privacy policy missing breach notification clause — Privacy policy does not specify the 72-hour PDPC notification timeline for notifiable data breaches.

HIGH · PDPA s. 26A-26E — Data Breach Notification Obligation · remediate within 30 days

2. **No published list of overseas sub-processors** — Privacy policy mentions 'cloud providers' generically without naming them; PDPA s. 26 requires comparable protection for overseas transfers.

HIGH · PDPA s. 26 — Transfer Limitation Obligation · remediate within 30 days

3. **Cookie consent banner present but lacks granular toggles** — Site shows a single accept/reject banner; PDPA-aligned but not granular for analytics vs. marketing cookies.

MEDIUM · PDPA s. 13 — Consent Obligation · remediate within 60 days

A qualified DPO should review findings before submission to regulators. Each finding above includes a recommended remediation in Section 8.

■ Recommendations

1. Add a Breach Notification section to the privacy policy stating the 72-hour PDPC notification commitment for notifiable breaches. (PDPA s. 26A-26E — Data Breach Notification Obligation · HIGH · remediate within 30 days)
2. Publish a Sub-processors page listing named vendors, processing purpose, hosting region, and the safeguard relied on (SCCs / equivalent protection). (PDPA s. 26 — Transfer Limitation Obligation · HIGH · remediate within 30 days)
